

Question 1

On the 16th of September, Will sent a batch of 25 SMS's. The reason for this could be that he had to send messages to people and did not have any data connection and had to use SMS.

Question 2

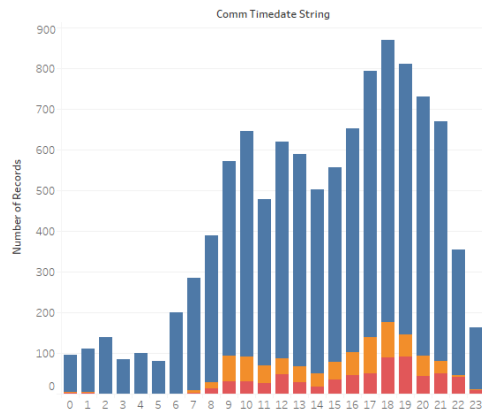

The cell tower with the most activity for each day is marked 157.

Question 3

During the evening it can be seen that Will uses a lot more data. This is possibly because he is home by that time and just came back from work. During that time he also makes a few calls and sends SMS's but the data is still in the majority. He also uses less data as the week goes by and on weekends the data usage is a lot less. He could be a person that loves the outdoors and leaves technology alone on weekends.
